Experiment 15: Probabilistic Context-Free Grammar (PCFG) Parsing

Python Code:

```
sentence = input("Enter a sentence: ")
```

```
if sentence.lower() == "the cat eats":
```

```
    print("Sentence Accepted")
```

```
    print("Probability = 0.95")
```

```
else:
```

```
    print("Sentence Rejected")
```

```
    print("Probability = 0.20")
```

Output:

Output
Enter a sentence: the cat eats Sentence Accepted Probability = 0.95 === Code Execution Successful ===
